Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 27 March 2006.

2a) This action is FINAL. 2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-17 are rejected under 35 U.S.C. 103(a) as obvious over Rickson (4,863,282) in view of Moore (6,405,867). Rickson discloses an apparatus for housing and dispensing an ultraviolet radiation protection product comprising a container (12) for receiving and storing a specific radiation protection product and a closure (11, 1, 10, 22) for the container. The closure comprising at least one ambient surface that is exposed at least in part to ambient conditions and ultraviolet radiation and an ultraviolet radiation indicator (Figures 1-18) integrally formed within at least a portion of the ambient surface and comprising a first, base color (Figure 1) and the ultraviolet radiation indicator comprising a thermochromic liquid crystal compositions that induces a single color change within the ultraviolet radiation indicator to a second color. Rickson also discloses the other limitations of the claims except for the photo-chromic in lieu of thermochromic.

Moore shows an apparatus for housing and dispensing an ultraviolet radiation protection product comprising a container (1) for receiving and storing a specific radiation protection product and a

closure (6) for the container. Moore further discloses any portion of the container including the lid can include photochromic material of the kind which will provide a perceptible colour change to a person upon variation in the intensity of ultraviolet radiation (column 3, lines 45-49). It would have been obvious to one having ordinary skill in the art in view of Moore to modify the indicator of Rickson so the indicator comprises a photo-chromic makeup in lieu of thermochromic liquid crystal because the selection of the specific material such as thermochromic or photochromic would have been an obvious matter of design choice inasmuch as the resultant structures will work equally well.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luan K. Bui whose telephone number is 571-272-4552. The examiner can normally be reached on 8:30-6.
